

Data Analytics Process

Case study:

Plan

- Which dish has to be prepared for dinner? Pulao, Parata

Prepare

- Check for the ingredients. Do I have the required vegetables for pulao?

Process

- I have to cut few vegetables, make ready of any spices and the powders

Analyse

- How much quantity should I put in the dish so that it taste good. Which combination of veggies to put in the dish?

Share

- Communicate with family members for the confirmation of veggies to put in the dish

Act

- Then finally cook
